To whom this may concern,

My name is Aaron MacDonald and I am currently in my third year of civil engineering at the University of New Brunswick. I would like to be considered for any summer employment opportunities with your company that could use my current skillset and allow me to learn and grow in the engineering field.

For the past six summers, I have worked in the Turf Department at Fox Meadow Golf Course and have gained experience with golf course maintenance, irrigation systems and the operation of different types of equipment. My workday began at 6am and I have a proven track record for being punctual and reliable.

Over the years, I have taken on roles of increased responsibility. This past summer, I was the senior lead for most day-to-day activities and was responsible for my own team who worked weekends on a rotational basis. On those weekends, I was responsible for opening and closing the maintenance facility, as well as ensuring the course was prepared for the golfers. I also provided training for new employees on various tasks and equipment. These opportunities helped me develop valuable leadership, time management, and teamwork skills.

While obtaining my diploma in the Bachelor of Science in Engineering program at the University of Prince Edward Island, I had the opportunity to serve as the Vice President of the UPEI Engineering Society. I represented the school on both the Atlantic and National levels. This experience broadened my understanding of both team dynamics and organizational planning – both of which I enjoyed very much.

I am very comfortable with technology and use Office 365 applications such as Excel, Word, PowerPoint and Skype for Business quite extensively

Though I have enjoyed my summer employment at Fox Meadow Golf Course, there is no opportunity to learn and grow in my chosen field of Engineering. I would like to be considered for any summer employment opportunity at your company and am confident that my skills and my work ethic would be of benefit to an employer.

Sincerely,

Aaron MacDonald
